BOSCH
Invented for life

- ▶ Flexible deployment - choose between cost-effective appliances or a software-only deployment.
- ▶ Embedded resilience - keep operations up and running even when multiple system components fail.
- ▶ Bosch video at its best - the best user-experience combining Bosch cameras with BVMS.
- ▶ Integration - integrate third-party cameras, storage and further systems into BVMS .
- ▶ IT environments and data security - benefit from full IT compatibility from installation to day-to-day management in a secure way.

BVMS Plus is a unique IP video security solution that provides seamless management of digital video, audio, and data across any IP network. It provides the best video management system to go with Bosch video surveillance devices, leveraging the unique capabilities of Bosch cameras and recording solutions. It nevertheless offers interfaces and standards to integrate other systems and manufacturers. The software is provided as an e-license via e-mail.

Certifications and approvals

General Data Protection Regulation

The General Data Protection Regulation (GDPR) is enforced on the 25th of May 2018. As a regulation it will be directly applicable to all EU member states without the need for national implementing legislation. As information captured, processed and stored by video surveillance systems is classified as "sensitive" the GDPR will cause significant impact on the video surveillance installations throughout Europe. BVMS includes the required functionality to ensure an organization can be GDPR compliant, which is further explained in the BVMS - GDPR document, which can be found on the following web page:

Bosch Building Technologies Community.

Installation/configuration notes

The BVMS system design guide is published on the following web page: Bosch Building Technologies Community.

The system design guide summarizes the BVMS design details, and serves as a guide to planning a BVMS system with Bosch cameras and storage. It focuses on BVMS combined with the VRM.

BVMS Enterprise

Multiple BVMS Plus or BVMS Professional systems can be combined into one BVMS Enterprise System.

Cameras within system context	200.000
Cameras per operator	10.000
Sub-systems	10 sub-systems with 1000 cameras per system or 50 sub-systems with 200 cameras per system

Software assurance

In addition to the Bosch Security Systems standard terms and conditions of sale, the Bosch Software Assurance is a great option to keep BVMS always up to date. With continuously changing platforms and version compatibility, regular updates are essential. With Bosch Software Assurance, you can relax knowing you are always entitled to the latest software enhancements. It ensures full technical support and access to hotfixes. The Bosch Software Assurance is available in the online product catalog.

Technical specifications

The release notes give a detailed overview on the changes that are implemented, compared to the previous BVMS version.

The architects and engineering specifications specify in detail what the system is capable of.

Both documents can be found on the following web page: Bosch Building Technologies Community.

System limits

Notice

The system limits are based on the hardware recommendations.

Maximum number of workstations	10
Maximum number of cameras	256
Maximum number of live and playback sites	0
Maximum number of stitching channels	100
Maximum number of intrusion panels	10
Maximum number of DVRs	10
Maximum number of VRMs	2
Maximum number of sustained events (Logbook) / sec	500
Maximum number of sustained events (without logbook) / sec	2500
Maximum peak event load / sec (within 60 minutes)	5000
Maximum number of events / sec from ONVIF cameras	500
Logbook size	4GB

Notice

The logbook size can be increased by moving the logbook to a separate database server.

Cameras

All Bosch cameras can be used under the device compatibility concept, which you can find on the Bosch Security & Safety community in the following article:

How-to: BVMS - Device compatibility.

The list of supported ONVIF cameras can be found on: <http://ipp.boschsecurity.com/bvms>.

If a camera is not listed, testing can be ordered by filling in the custom camera integration form.

Management Server and Mobile Video Service

It is recommended to run the Video Recording Manager and the BVMS Management Server on the same computer.

Item	Description
Operating System	Windows Server 2012 R2 (64-bit) Windows Server 2016 (64-bit) Windows 10 Professional (64-bit) Spring Creators update (1803) Windows 10 Professional (64-bit) Fall Creators update (1709) Windows 10 Enterprise (64-bit) LTSB 2016 (1607)
CPU	Intel Xeon E3-1275 V3 (3.5 GHz, 4-core, 8MB, 84W)

Network	1 Gigabit/s network interface card

Operator Client

Item	Description
Operating System	Windows 10 Professional (64-bit) Spring Creators update (1803) Windows 10 Professional (64-bit) Fall Creators update (1709) Windows 10 Enterprise (64-bit) LTSB 2016 (1607)
CPU	Intel Core i7 4770 3.4 GHz (up to 3.9 GHz)
RAM	8GB
Free disk space	Minimum 5GB for Single Site Systems Minimum 10GB for Enterprise Systems
Network	1 Gigabit/s network interface card
Display resolution	Minimum: 1280 x 1024 Maximum: 1920 x 1080
Graphic card	Nvidia Quadro K620 Nvidia Quadro M2000 Nvidia Quadro M4000 Nvidia Quadro P2000 Nvidia Quadro P4000 Intel HD Graphics 530

Network

To achieve the performance listed in the table below, a 1 Gigabit/s network is a minimum requirement between the Operator Client and Management Server.

(Unicast) Maximum number of workstations simultaneously viewing the same camera	5
(Multicast) Maximum number of workstations simultaneously viewing the same camera	100
Event response time (assuming sufficient network performance considering bandwidth and delay)	< 1 second
Alarm visibility time (assuming sufficient network performance considering bandwidth and	< 2 seconds

delay), including 1 live image pane, 1 instant playback image page, and 1 map image pane.

Notice

When the system does not have enough network resources, or is experiencing a temporary decrease in network performance, the event response time and alarm visibility time may increase.

Notice

The list of communication channels and required network ports can be found in the BVMS Configuration manual.

Storage devices

The storage quick selection guide, which also includes non-Bosch storage devices, can be found on: <http://ipp.boschsecurity.com/bvms>
