

DCNM-CB250-I System installation cable 250m

DICENTIS

- ▶ Low smoke zero halogen jacket to comply with safety and environmental standards
- ▶ Creation of custom length network cables

The System Installation Cable is used for creating custom length system installation cables. The system installation cable can be used to make cables with a maximum length of 100 m (328 ft) by terminating with the connectors for solid core cables (DCNM-CBCON-I) using the system cable toolkit (DCNM-CBTK). The system installation cable has a low smoke zero halogen jacket to comply with safety and environmental standards. The cable also has a solid core, which provides better performance for cable lengths over 5 meter.
